

**It's time
to change.**

**Enjoy a six-month FREE*
licence when you
upgrade to our new
ProtectIT solution.**

This offer is valid, provided the client has a single, active, paid for licence. All additional device licences on the same domain are included in this offer.

IronTree is perpetually evolving. Our mission, as it always has been, is to keep you ahead of the risk curve. Until now, you've been using our backup solution, it is what we've been known for, but now for a limited time, we're offering you our new IronTree ProtectIT cyber security agent from a world-leading vendor, for free!*

Using a single multi-functional agent, managed from a single console, we can secure your data from all threat models. ProtectIT will allow you to increase your security stance by adding layers of protection to your company. These layers include:

1. Increased security with multiple layers of protection from malware, ransomware, viruses.
2. Secure, encrypted and immutable cloud backups.
3. Patch management to ensure all relevant security patches are deployed to all devices.
4. Device control to manage removable media.

Why use ProtectIT?

-  Ransomware and anti-virus protection
-  Patch Management with fail-safe patching
-  Exploit prevention (memory protection, code injection and privilege escalation protection)
-  Disaster Recovery as a service
-  Device Control
-  Cyber Scripting
-  Forensic backup with safe recovery
